Graduation project

This graduation project aims to explore sustainable and community-driven solutions for the rehabilitation and revitalization of Sarouja, a historic neighborhood in Damascus, Syria, to preserve its cultural heritage and identity.

01

projects undertaken during employment

This presentation highlights my residential, and other projects completed after graduation demonstrating my ability to design functional and visually appealing living spaces that cater to the unique needs of diverse communities.

02

projects undertaken during college

This section showcases my urban planning, and design projects completed during my time in college, highlighting my skills in design, analysis, and community engagement.

Graduation project

About sarouja

Sarouja is a municipality of Damascus, Syria, due north of the Old Damascus.

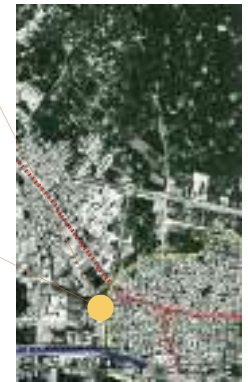

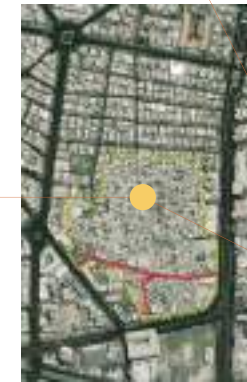

It was the first part of Damascus to be built outside the city walls in the 13th century.

The neighbourhood was built during the Mamluk Period in the 14th century and features many monuments from that period.

Historically, Sarouja did not occupy the center of the city, as it is located in the **northwest of the Damascus Citadel**, and was bordered **to the north** by the agricultural area of Al-Basateen and Ain Al-Karsh.

From the south, Al-Bahsa and Al-Assanjqadar, **from the west**, Al-Bahsa Al-Barani and the upper east

where is Sarouja?

what happened to Sarouja?

Below, I will explain the dark side present in Sarouja, in addition to the proposed solutions in return.

The dark side!

- The ancient buildings suffer from a bad physical condition due to a lack of maintenance and attention
- Distorting the structural facades of buildings by installing billboards, in addition to the shops bypassing the sidewalks
- Unorganized roads, in addition to the lack of parkings
- The absence of a volumetric overlap of the high-rises surrounding the adjacent traditional buildings

medium physical condition
bad physical condition
ruined

physical condition plan

The bright side!

- The sidewalk is for pedestrians only.
- The facade must be regular.
- Shops must not exceed the sidewalk

what is the new vision ?

We're revitalizing Damascus' oldest neighborhood by restoring buildings, improving the market, and promoting cultural heritage. Our approach pre-serves **tradition** while adding modern infrastructure. A **cultural program** showcases history and traditions. Responsible **commercial activities** attract tourists and benefit locals.

tell me about the soyqa?

Opening chimneys in
the facades of buildings

Loss of original covers

Loss of architectural and
urban identity

We can't see the sidewalk
because of the parked cars

The stores are not in a straight line

Covering the basalt stone with an asphalt layer, which led to raising
the level of the streets
And the loss of the traditional character of the floor of the axis

A Selection of Architectural Projects

Undertaken During Employment

First traning project after graduation

At ghassan aboutd office :

my job was devided into 3 main sections.

section 1: creating interior plans for the apartments

sextion 2: recreate the mall and the gym area

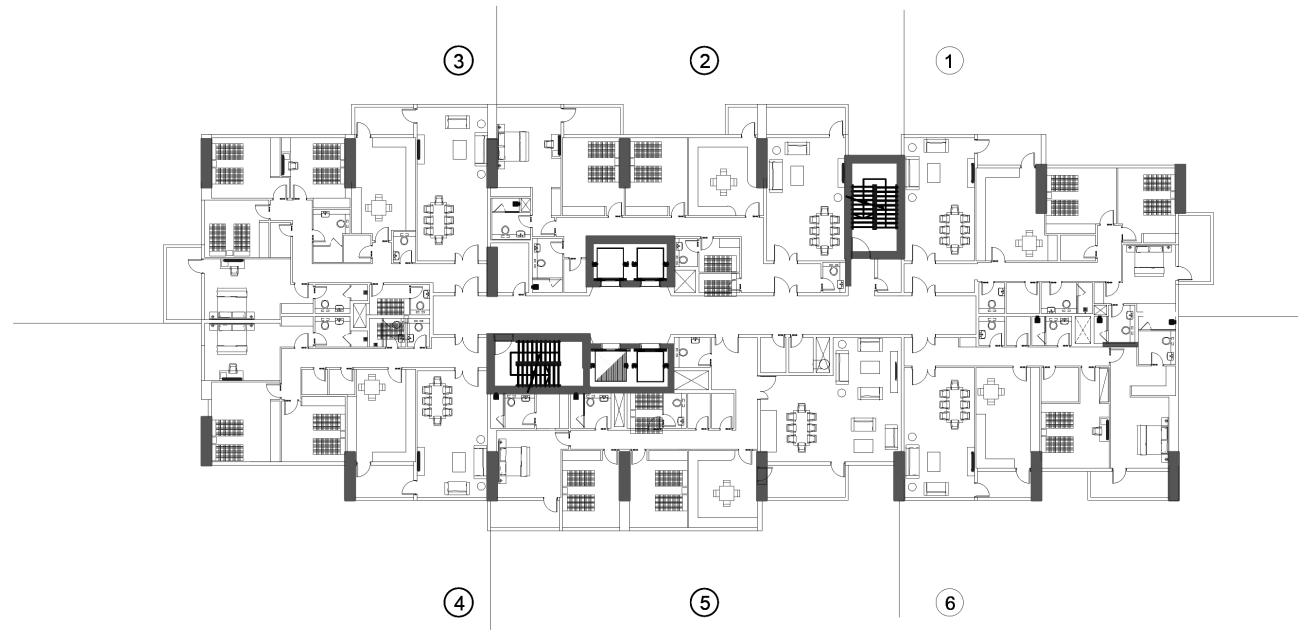

section 3: Rearrange the parking and create a structural plan for the columns that is suitable for the new parking

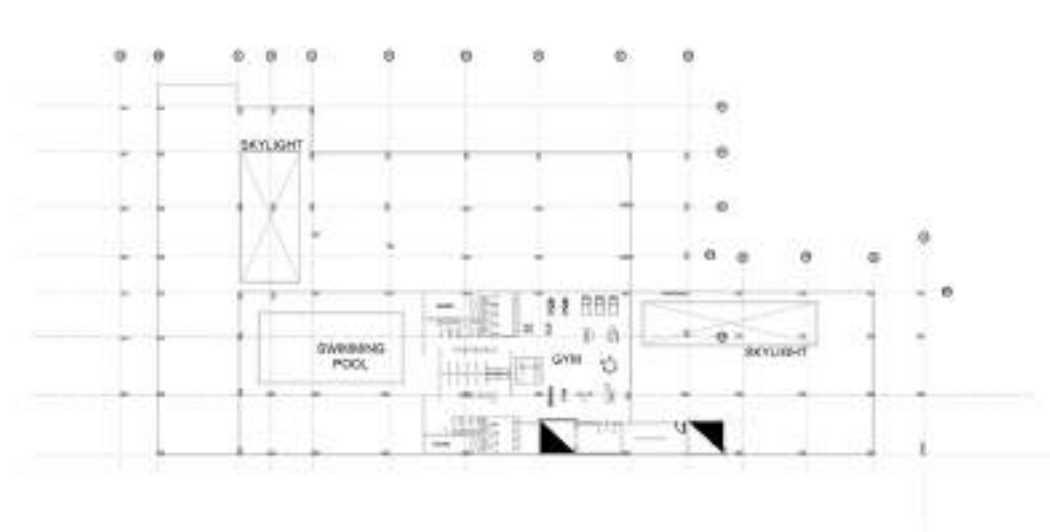

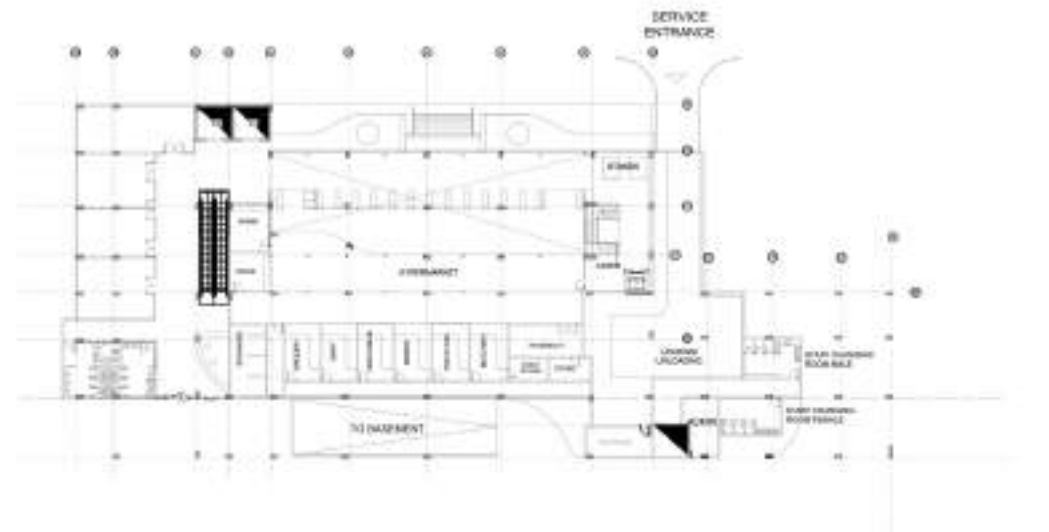

● Al Amana Tower
